Deserving Students to Have Expenses Paid-History of University Project.

(BY THE NEW ASSOCIATED PRESS—A.M.)

W ASHINGTON, Dec. 10.—The proposed gift of \$10,000,000 by Andrew Carnegie for educational purposes was discussed at today's meeting of the Cabinet. It was stated after the meeting that the President had received a communication from Carnegie on the subject of creation of a fund for the extension of higher education. It is said that his proposition does not involve the establishment of university buildings in Washington, but rather the placing of a fund in the hands of government trustees from which the expenses of deserving students may be paid in the line of original investigation at home or abroad.

WASHINGTON, Dec. 10.—Hon. Carroll D. Wright, Commissioner of the United States Department of Labor, today made the following statement as to Carnegie's endowment of a national university at Washington:

"The general discussion which has been carried on during the last twenty-five years in relation to the establishment of a national university in Washington has culminated in a magnificent plan and endowment by Andrew Caregie. For a number of years the university idea held sway, but about two years ago the matter was taken up by years ago the matter was taken up by the Washington Academy of Sciences, and this body, in cooperation with the George Washington Memorial Associa-tion, formulated a definite plan, which differed radically from the university

"Dr. Daniel C. Gilman, ultimately president of the Johns Hopkins Univer-sity, was slected director of the insti-

"When Mr. Carnegie came to consider the question of endowing a national university at Washington, he investigated the whole subject with his
usual thoroughness, and found that an
institution devoted to reasarch and the
training of capable persons was more
in accord with his conceptions than the
establishment of a university that
would be a rival of the already-existing
universities of the country. How far he
was led to this conclusion by the work
that had been done by the organisations in Washington is unknown, but
his action indicates that he had faith
in the general plan that had been developed and crystallized in that city.

development. Reciprocity does not mean a sacrifice of one industry in order to help another."

Col. Watterson of Kentucky was greeted with three cheers. He said, in part:

"I have lived to see—and I do not deny protectionism its share of the credit, my contention being that it was bound to come and might have sheen had cheaper—I have lived to see the American manufacturer able to meet his foreign rival in every neutral market in Christendom, sure at least of recovering and centrolling those markets that recographically belong fo him; because, from a collar button to a locomotive, the finished product of the American manufacturer today beats the world.

"And this leads me to ask, if all of us are to turn free traders, where is the revenue needful to support the government—economically administered;—to come from? We are barred direct taxation. Henry George being dead, and Tom Johnson alone surviving, Massachusetts, the bell-weather of innovation, will have to wrestie with the single-tax problem even as long as she wrestied with the problem of aboli-

the single-tax problem even as long as she wrestled with the problem of aboli-tion; and, meanwhile, somehow, the government must live. Is it possible that, being a conservative philosopher and a responsible journalist, I must go back upon my own progeny, cross my own footprints and become the cham-pion of a revenue tariff with 'incidental protection' enough to supply our poor President and his advisers, and

ecunious employés out of the poor-louse?
"Shall there be another scandal about another liaison between Massachusetts and Kentucky, another league between the Puritan and the blackleg, another 'era of bargain, intrigue and corruption era of bargain, intrigue and corruption as a consequence of our forgathering here tonight? Can it be that it was for this you would lure the star-eyed one away from the cold pedestal, whereon, like Niobe, she stands, all tears, to these gilded halls and festive scenes? I was warned before I left home that 'those Yankees are mighty cute,' and I am afraid that, when I see hock the wife once will shake their get back, the wise ones will shake their heads and wonder what kind of walk-ing it was between Boston Compon and the headwaters of the Beargrass!"

and the headwaters of the Beargrass!"
Continuing, he said:
"We live in untoward times. We have witnessed wondrous things. With the passing away of the old problems, new problems confront us. Modern invention has smashed the clock and pitched the geography into the sea. The map of the world, so completley altered that it really begins to look like the Fourth of July, lends itself as a telescope to the point of view. Concentration is becoming the universal demand, the survival of the fittest, the prevailing law. The idiosyncrasy of the inneteenth century was liberty. The idiosyncrasy of the twentieth century is markets. Be it ours to look to it that we steer between the two extremes of commercialism and anarchism, for of commercialism and anarchism, for if we have not come to the heritage, which God and nature and the providence of our fathers stored up for us, to employ it in good works, we had better not come to it at all.

"Thoughtful Americans, true to the instincts of their manhood and their received answering the accounting.

instincts of their manhood and their racehood, answering the promptings of an ever-watchful patriotism; carrying in their hearts the principles of that inspired declaration to which their country owes its being as one among the nations of the earth; carrying in their minds the limitations of that matchless Constitution to which their government owes that we are as a rule nearest to being in error when we are almost positive and emphatic; that grievous injustice and injury are perpetrated by the misrepresentation and abuse which are so freely visited upon public men for no other cause, or offense, than a difference of opinion; and that intolerance, the devil's handmaiden, in our private relations, embraces the sum of all viciousness in the affairs of church and state.

braces the sum of all victousness in the affairs of church and state.

"Among men of sense and judgment, of heart and conscience, the subjects of real difference must needs be few

and infrequent. Even these may be often accommodated without hurt to any interest, all government being more or less a bundle of compromises. It is that we do in the aggregate what no one of us would dream of doing in severalty: the point turning perhaps upon the division of responsibility, but more upon the pressure which in excited times the wrong-headed and stout of will impose upon the more moderate, the better-tempered and bettered-advised.

THE PRESS.

THE PRESS.

The press—particularly the yellow press—is doing a noble work toward the correction of this evil; because already people are beginning to believe nothing they read in the newspapers, and, after a while, tiring of an endless, daily circuit of misinformation, they will begin to demand a journalism less interesting and more trustworthy, and, believe me, whenever they discriminate between the organ of fact and the organ of fancy—there shall not be wanting editors who will prefer to grow rich telling the truth than to die poor telling lies. We may not have reached yet the summit of human perfectibility, where we can hold our own with the merchants of Boston, but even among the members of my profession the self-sacrificing spirit lives apace, and the time will come when the worst of us will scorn the scoop that is no longer profitable!

"You have been told, and many of you doubtless believe, that life is less secure in Kentucky than in China, or even in Chicago; and, but a little while ago a Kentucky than in China, or even in Chicago; and, but a little while ago a Kentucky mother was represented as thanking the One Above that her boy was bravely fighting in the Philippines instead of having 'to face the perfls of the deadly roof tree at home. You have been told that, because we have some surviving prejudice against bringing the black man, and bother into the bosom of our families, we are his enemies and would take unfair advantage of his ignorance and poverty. None of these things are true. They are figments of a bigotry that obstinately refuses to see both sides. There is an equal quantum of human nature in Kentucky and in Massachusetts. There are as many church bells in the Blue Grass country as in the Bay State country, and they send nature in Kentucky and in Massachusetts. There are as many church belia in the Blue Grass country as in the Bay State country, and they send the same sweet notes to heaven and sound exactly alike."

Col Watterson said:

"I believe that the American Union came among the nations even as the Christ came among the sons of men. I believe that constitutional freedom according to the charter of American liberty is to government what Christianity is to religion; and, so believing, I would apply the principles and precedents of that charter to the administration of the affairs of the outlying regions and peoples come to us as a consequence of the war with Spain precisely as they were applied to the Territories purchased of France and acquired of Mexico; not merely guaranteeing to them the same uniformity of laws which the Constitution ordains in the States of the Union, but rearing among them kindred institutions, essential not less to our safety and dignity than to their prosperity and happiness. Entertaining no doubt that this view will prevail in the final disposition, my optimism is as unquenchable as my Republicanism; and both forecast in my mind's eye centuries of greatness and glory for us as a nation and as a people.

"We are upon the ascending, not the

greatness and glory for us as a nation and as a people.

"We are upon the ascending, not the descending scale of national and popular development. We are to recreate out of the racial agglomerations which have found lodgment here a new species and a better species of men and women. We are to revitalize the primitive religion, with its often mispleading theologies, into a new and practical system of life and thought, of universal religion, to which the Declaration of Independence, the Constitution of the United States and the sermon on the Mount of Olives shall furmon on the Mount of Olives shall furto the end that all lands and all tribes shall teem with the love of man and the glory of the Lord. We are passing. it may be, through an era of acquisi-tion and mediocrity, a formative era-but we have made and are making progress; and, in spite of the threats of Mammon, the perils that environ the or Mammon, the perisa that environ the excess of luxury and wealth, in spite of the viciousness and the greed, we shall reach a point at last where money will be so pientiful, its uses so limited and defined, that it will have no longer

W ASHINGTON, Dec. 16.—[Exclusive Dispatch.] The American Beet-sugar Producers' Association has been in session here all day, devising ways and means for thwarting the efforts of the sugar trust to have the duties used on Cuban sugar reduced. The association met behind closed doors, and at the conclusion of the meeting this evening, Gov. Bliss of Michigan, who was in attendance, told The Times correspondent that, while the association's members do not think it advisable to give out the exact proceedings, he would say the entire meeting was given over to a dis-

The latest Cuban proposition is to have the President send a special message to Congress urging that the present Cuban sugar crop, which is owned largely by the sugar trust, be admitted to this country without the payment of any duty, or at any rate at the very lowest duty compared with Dingley rates. To this demand the beet-sugar men raise the following objections:

First—That the Cuban planters have stored large quantities of sugar from past crops, waiting for such an opening as this, and that the export to the United States would therefore be larger than anticipated.

Second—That the sugar-refining trust would be the great beneficiary of the removal or reduction of duties on Cuban sugar, and hence that act of the administration and Congress would be regarded by many critics as a surrender to the trust.

Third—that other countries having treaties of commerce and friendship with us would raise a cry against discrimination in favor of Cuba.

LODGE ON CANAL.

IBT THE NEW ASSOCIATED PRESS-P M.]

WASHINGTON, Dec. 10.—After a number of nominations had been confirmed, Senator Lodge called up the Hay-Pauncefote treaty. He contended that the new treaty does away with all the objectionable features of the treaty of the last Congress, and enumerated the particulars in which the revised agreement conforms to the ac-

fortifications shall be erected commanding the canal or the waters adjacent, etc.

This, he said, was a material concession to the United States, and was quite sufficient to meet the objections made against the agreement, that the United States would have no power to protect its property. It practically left the United States would have no power to protect its property. It practically left the United States free to fortify the canal in case it should be considered desirable to do so, and was in line with the omission of the restriction keeping the canal open in time of war. The fact that the invitation contained in the old treaty to the various powers to give their adherence to the agreement had been eliminated from the new convention, he said, was another compliance with the action of the Senate on the original treaty.

These concessions, Mr. Lodge urged, were ample, and he contended that they were of such a nature as to render the new treaty acceptable to all American citizens who wanted to see a canal constructed. Practically, he said, Great Britain had agreed to turn the entire management of the canal over to the United States, not only in time of peace, but in time of war, and no one could doubt that in case of hostilities the United States would be at liberty to construe the omission of the clause in rule 3 as having this effect.

Senator Culberson asked Mr. Lodge if it was not true that article 8 of the Clayton-Buiwer treaty, establishing the general principle of neutralization, was retained in the new agreement, but Mr. Lodge replied that while there was a declaration to the, effect that the general principle of neutralization was retained in the new agreement, but Mr. Lodge replied that while there was a declaration to the, effect any longer.

It was understood that the treaty will be called up tomorrow.

PHILIPPINE TARIFF LAWS, IBT THE NEW ASSOCIATED PRESS—A M.)
WASHINGTON, Dec. 10.—The Republican members of the Ways and Means Committee today agreed on a Philippine measure, and later the entire membership of the committee, Democrats and Republicans, was called together for the first time.

At an early meeting of the Republican members, Col. Edwards, chief of the Insular division of the War Department, was further heard as to the methods employed in framing the schedule of rates on imports to the Philippines. In particular, he brought out the fact that care was taken to consult with the interested industries whenever a delicate question of adjustment arose. The War Department showing brought out the fact that in effect the United States enjoys a preference under the present Philippine rates, for, although no preference is expressed, yet articles are so described as to prefer the American products. Canned goods are specified as a marked instance of this, the description being such as to fit the American product, and give it a decided advantage over foreign canned goods.

Mr. Russell's proposition to impose 50 per cent, of the Dingley rates and Mr. Tawney's to repeal the export tax in the Philippines were voted down by 3 to 5. The Cuban commissioners, through Chairman Payne, asked for a hearing, but upon Mr. Russell's motion they were advised that no hearing would be given until after the holidays, the object, being to postpone the matter of Cuban reciprocity until after the holidays.

The committee was formally organ-ized, and sub-committees appointed. The bill agreed upon is designated a temporary measure, and provides that the tariff laws of the Philippine com-mission shall have full force and effect. Upon all goods coming from the Philippines to the United States, the Philippines to the United States, the present rates of the Dingley law shall be levied and coliceted. The same tonnage taxes shall be levied upon vessels coming into the United States from the Philippines as levied upon vessels coming from foreign countries until January 1, 1905, with a proviso that the coastwise laws of the United States shall not apply to foreign vessels plying between the United States and the Philippines. All duties and tonnage taxes collected either in the Philippines or in the United States are be covered into the Philippine reas-

Friday and passing it after one day's debate next Tuesiday, under a special rule.

The following are important sections: "Sec. 4. That the dities and taxes collected in the Philippine archipelago in pursuance of this act, less the cost of cellecting the same and the gross amount of all collections of all duties and taxes in the United States upon articles imported in the Philippine archipelago and upon vessels coming therefrom, shall not be covered into the general fund of the treasury of the United States, but shall be held as a separate fund and paid into the treasury of the Philippine Islands.

"Sec. 5. That when the duties prescribed by this act are based upon the weight of merchandise deposited in any public or private bonded warehouse, said duties shall be levied and collected upon the weight of such merchandise at the time of its entry.

"Sec. 6. That all articles manufactured in bonded manufacturing warehouses in whole or in part of imported materials, or of materials subject to internal-revenue tax and intended for exportation from the United States to the Philippine Islands, shall, when so exported, under such regulations as the Secretary of the Treasury may prescribe, be exempt from internal-revenue tax and shall not be charged with duty except the duty levied under this act upon imports into the Philippine Islands."

TEXT OF TARIFF BILL. WASHINGTON, Dec. 10.—The text-of the Philippines Tariff Bill agreed on by the House Ways and Means Com-mittee, is as follows:

WASHINGTON, Dec. 10.—The arrangement entered into at Managua yesterday between United States Minister Merry and the Minister of Foreign Affairs was in the nature of a protocol, and was not, strictly speaking, a treaty. It is, in effect, a definition, in advance, of the character of a treaty that Nicaragua is willing to enter into with the United States in the event that the Hay-Pauncefote trenty is ratified by the United States and great Britain. There are supposed to be legal reasons why a treaty, pure and simple, could not be entered into between the United States and Nicaragua in advance of the consummation of the Hay-Pauncefote treaty.

A similar arrangement has been or will be made with the government of Costa Rica, to secure the necessary rights on that part of the San Juan River essential for canal purposes, and possibly subject to Costa Rican sovereignty.

WASHINGTON, Dec. 10.—[Exclusive Dispatch.] Those Senators and Representatives who are especially interested in legislation providing for extension of the Chinese exclusion act have come to the conclusion that the circumstances of the situation require that no extension beyond a period of two years should be enacted at present. The reason for this is that, following the enactment of the Geary exlowing the enactment of the Geary ex-

DEMOCRATIC RUMPUS.

JONES BUMPS AGAINST TELLER WASHINGTON, Dec. 10.—[Exclusive WASHINGTON, Dec. 10.—[Exclusive Dispatch.] There was a lively little rumpus in the caucus of the Democratic steering committee of the Senate this afternoon. The affair was interesting, because it indicates how hard, indeed, it is for Democratic brethren to dwell together in peace. The cause of today's rumpus was the attempt of Senator Jones of Arkansas to lead the diagracted hosts of his party, and the determination of the distracted hosts not to be led. espedistracted hosts not to be led, espe-ially by Jones, who protests that he is still true to Bryan, and rega

SAN FRANCISCO, Dec. 16.—The police believe that they have the man who murdered George Griffiths in Grass Valley, and threw his body into an abandoned mine.

This afternoon, at the Risdon Iron Works, Detective Ross Wittaker and Officer James McGowan arrested Pichard Bennett, and locked him up in the city prison tanks. Immediately after the arrest Wittaker left for Oakland, where he expects to find a woman named Mrs. Magie Allen, who is suspected of having assisted Bennett in murdering Griffiths. She formerly lived with Griffiths, but fied with Bennett from Grass Valley shortly after the murder.

The authorities of Grass Valley, suspecting Bennett and the woman, and learning that he had a sum of money coming to him at the Risdon Iron Works, telegraphed to the local police to apprehend him.

Bennett, while admitting that he knew Griffiths and had heard of the murder, declared this afternoon that he is innocent of the crime.

(BY DIRECT WIRE TO THE TIMES.) WASHINGTON, Dec. 16.—[Exclusive Dispatch.] Affairs in Venezuela, it was acknowledged at the State Department today, are receiving more attention from the administration than the ap-parent tranquility with regard to the attitude of Germany indicates. The declaration attributed to President Cas-tro that he is willing to give Germany concession for a large colony sug-ested to the officials of the State Department that at the proper time it may be necessary to direct the atten-tion of Venezuela to the Monroe doc-

[BY DIRECT WIRE TO THE TIMES.]

WASHINGTON, Dec. 10.—[Exclusive Dispatch.] Another illustration of the methods the President is employing in his search for men who measure up to his announced standard of fitness for public service is afforded in the case of a factional fight among Missouri Republicans.

For nearly a month the Missouri factionists have been besieging the White

House at all possible hours of day and night in the interest of respective can-didates for the various Federal offices in that State. One faction is headed by R. C. Ker-

ens, a member of the Republican Na-tional Committee, and a close friend of Chairman Hanna. The other faction is headed by Secretary Hitchcock, who has as his chief lieutenants the only two Republican Congression. two Republican Congressmen from Missouri, Joy and Barthodit, and State two Republican Congressmen from Missouri, Joy and Barthodit, and State Chairman Akins. The principal bone of contention is the surveyorship of the port of St. Louis, an office which pays 37500 a year, and which for four years has been held by C. H. Smith, who at one time was Col. Kerens's private secretary. Col. Kerens has asked for the reappointment of Smith, and will listen to no offer of compromise. Secretary Hitchcock and his lieutenants, have recommended W. G. Boyd, who, although a brother-in-law of ex-Gov. David R. Francis, is a lifelong Republican. Over these two recommendations the President was badgered by factions until, being unable to any longer stand their importunities, he exciaimed "A plague on both your houses," and forthwith sent for his literary f-iend, William Marion Reedy, well known as a newspaper writer in the control but presumably knowing literations and control but presumably knowing literations.

GRIFFITES MURDER.

RICHARD BENNETT ACCUSED.

(BY THE NEW ASSOCIATED PRESS—AM.)

SAN FRANCISCO, Dec. 10.—The police believe that they have the man who murdered George Griffiths in Grass Valley, and threw his body into an abandoned mine.

This afternoon, at the Risdon Iron Works, Detective Ross Wittaker and Officer James McGowan arrested Richard Bennett, and locked him up in the city prison tanks. Immediately after the arrest Wittaker left for Oakland, where he expects to find a woman named Mrs. Magje Allen, who is suspected of having assisted Bennett in murdering Griffiths. She formerly lived with Griffiths, but fied with Bennett from Grass Valley, suspecting Bennett and the woman, and learning that he had a sum of money coming to him at the Risdon Iron Works, telegraphed to the local police to apprehend him.

Bennett, while admitting that he knew Griffiths and had heard of the murder, declared this afternoon that he is innocent of the crime.

He Farms Out the Farm and Fails to Pay Taxes on the Land Until Forced

Sale.

(BY DIRECT WIRE TO THE TIMES.)

NYACK (N. Y.) Dec. 10.—[Exclusive Dispatch.] Russell Sage neglected to pay his State, county and school taxes on a farm which he owns at Sickletown, Rockland county, and today County Treasurer Randolph offered the farm for sale at public auction for the non-payment of taxes. An agent for Sage was present and bought in the property for the amount of taxes due and unpaid.

Sage's farm consists of nearly one hundred acres, and contains a house and barn. The place is occupied and worked by E. C. M. Rand, as Sage 1: not sufficiently familiar with raising Rockland county potatoes and cabbages to warrant his working the farm himself. Rand, however, not being the owner, leaves the payment of taxes to Sage, to pay out of his spare change.

Kansas Prosperous.

Kansas has more ready money on hand at this moment than it ever had before in all its history. Its banks and, perhaps, recommended him to an equally impecuation friend, is by no means defunct. No, the last of the state about \$35,000,000, which is in the neighborhood of \$60 for each man, woman and child in the State. This is far ahead of all past records. On a bank capital of about \$15,700,000 in the State there is a profit and surplus item of over \$6,000,000. These figures were never closely approached before in all Kansas' career.—[St. Louis Globe-Democrat.]

MEN AND MEASURES.

Yet many people imagine that more or less it is merely to give the skillet an extra shake or two. Those who have least actual familiarity with money are pronest to thinking of millions as millionaires think of pennies. Thousands of good people believe that for everybody except themselves money grows on bushes, and that all elections are knocked down to the highest bidder. The bare fact is fowering both to our political standards and our standards of morality. The mere statement is in f morality. The mere statement is sense degrading. PROPOSITION TO HANNA.

"Nevertheless, it is undoubtedly true that money is as essential to political battles as powder and ball to actual battles, and the proposition I have to submit to my friend, the Senator from submit to my friend, the Senator from Ohio, is that he and I come to an agreement about what sum of money the two organisations will require honestly to tide them through to the next Presidential election; that we raise this sum on a joint note and divide the proceeds equally; and that, when the election is over the party carrying the country shall pay the note. If it be an inducement, I will further agree that the money to be raised shall be of standard weight and value, expressed in gold and silver and paper convertible into either at the will of the holder. PEOPLE NOT CORRUPTED.

"But whether this or some other plan

shall in the end weather the breakers of plutocracy. It is true that, possessed of no great aristocratic titles,
or patents of nobility, money becomes,
and will probably remain, the simplest
and readiest of all our standards of
measurement. Yet, even now, it is
grown such a drug in the market, that
some far-seeing men, finding it so
plentiful and easy to get, are giving it
away in sacks and baskets. Time will
show that its value is relative, and
that aftes the actual needs of life, it
will buy nothing that wise men will
think worth having at the cost either
of their conscience or their credit.
"Give me the right—not in the character of an abstraction, so often misleading to theorists and doctrinalresnot as a fash of fancy, so often ir-

leading to theorists and doctrinaires— not as a fash of fancy, so often ir-radiating the dreams of the visionary with its illusory hopes—but the plain, simple right in plain and simple things, obvious to the reasonable and the fair-minded, arising out of the common-sense and common honesty of the com-mon people, relating to the actualities

tions on the altars of opulent partylsm. 'The people, as a people, can never be corrupted. The whole history of a hundred years of constitutional government in America, the moral lesson and the experience of all our parties, may be told in a single sentence, that, when any political organism, grown over-confident by its successes and faithless to its duty, thinks it has the world in a sling, public opinion just rears back on its hind legs and kicks it out. In that faith I rest my hope of the future of the country; sure that in the long run, wrong cannot prosper, and that an enlightened public opinion is a certain cure for every ill.'

SENATOR HANNA SPEAKS. ation is today supreme in the agricul-ural and industrial business of the vorld, but is at the very lowest in re-pard to its merchant marine.

world, but is at the very lowest in regard to its merchant marine.
From the highest point in 1861, when we carried \$2 per cent. of the foreign trade, he said, we have decreased, until today American ships only carry \$ per cent. of the foreign tonnage. Senator Hanna said: "We are to build a magnificent navy, and shall continue until we are second to no nation. We should also build something for that navy to defend. The amount now paid annually by American merchants into the pockets of foreign ship owners is \$300.000.000. No country on the face of the globe could stand that drain but the United States. And why need we stand it? We can see how the subsidy is affecting the English in their war with South Africa. Her vessels have been taken for transporting her troops

clared that the bill which was presented last Monday had been simplified and modified to meet the objections to the former one. He declared that the present bill was designed to benefit American owners and American capital only, and that if something was not done to protect the American merchant marine soon, every channel for trade, every hole, would be plugged by merchants of England. Germany and France until the Americans should have to fight to get in. He declared that the only solution of the problem was to place the American merchant marine on an equal footing with that of the other countries. By figures, he showed that the European countries are paying subsidies amounting to \$25,000,000 a year.

The Dress of the Dandles.

The Dress of the Dandies.

We can scarcely believe that the West End tailor of today will agree with the author of the beautifully-staged play which Mr. Tree has just produced at Her Majesty's Theater, in thinking that the last of the dandies pased away when Count D'Orsay died-meeting the Reet King "like a gentleman" in his Paris studio. There were dandies in those days, and there are dandies in those days, and there are dandies in these; but, it must be confessed, the beaux of our own time, though at least equally exacting in their demands upon their tailors' parience and abilities, are in another gallery altogether as regards picturesqueness and ideal in the matter of artistic costume. A sleeve that must not show an eighth of an inch too much ouff; a coat that must be measured for over the skin if his in.

artistic costume. A sleeve that must not show an eighth of an inch too much cuff; a coat that must be measured for over the skin if it is intended to be worn with slik undervest; a jacket with a divided pocket for cigars and a tubular receptacle for the fountain pen; a watch—and pocket to match—the thickness of a penny piece for evening-dress wear; these are some of the minor niceties which the twentieth century tallor has to bear in mind when dealing with those of his customers who may be considered the lineal descendants of the dandies of the early rays of Dickens, Disraell and Bulwar Lytton. Unfortunately, too, the class of gentlemen who consider they have performed their whole duty to their tailor when they have worn his clothes, and, perhaps, recommended him to an equally impecunious friend, is by no means defunct. No, the last of the dandies is not dead, or, at any rate, he has not yet been burded or cremated.—[Tallor and Cutter.

Pember Reeves, father of compulsory arbitration, and agent general for New Zealand, declared to a Daily Mail representative that the law has been a complete subcess. "There has been no strike of organized labor for the past six years," he said. "There have been a few petty cases by unorganized laborers varying in numbers from sixteen to fifty. In no case has there been a strike affecting more than fifty men during these six years. It must be remembered that the act deals only with organized labor."—[London Mail.

Slang Caught at its Source.

It is not often that the origin of a siang expression can be traced, and when its pretended pedigree is related it usually has a sound of inherent improbability. An expression heard many times at the horse show was "to give the horse the gate." It meant that the judges decided that the horse was impossible as a competitor for the prize offered, and ordered him out of the ring. And already this expression has been heard several times outside. One girl was heard to say to another: "I thought George and Sally were going to hit it off, but for some reason she gave him the gate." Girls in such cases used to give mittens, but the new expression has superseded the old.—[New York Tribune.

SLASH DEEP INTO RATES.

Utah the Beneficiary of a Railroad War.

Regular Freight Tariff Cut in Two.

Transcontinental Passenger Association-Trains Must Run on Time.

BY THE NEW ASSOCIATED PRESS-A.M. SALT LAKE (Utah) Dec. 10.—Every railroad doing business in Utah, according to the Heraid, is engaged in a rate war, the siashing being principally on west-bound traffic, for which there is a wild scramble regardless of rates. The Rio Grande roads, and the Missouri Pacific, comprising the west-

fight.

The Oregon Short Line and the Union

With the Union Pacific in the fray, all the roads are now mixed up in it, and west-bound business from the Atlantic seaboard is being moved in many instances at 50 per cent. of the regular tariff rates. Business from Chicago and the Missouri River was taken yesterday at 30 to 35 per cent. reduction on the regular tariff.

The trouble orginated, according to the Herald, about a month ago when the Mallory and Morgan steamship lines became engaged in active competition on ahipments from New York via New Orleans and Gaiveston to points in the Rocky Mountain territory.

INCORPORATION ARTICLES. NEW YORK, Dec. 10,-There

NEW YORK, Dec. 10.—There were filed papers under the laws of New Jersey this afternoon of what is apparently intended for a combination like that embraced in the charter of the Northern Securities Company, which is absorbing the securities of the Northern Pacific, Great Northern, and other Northwestern railroads.

The title of this new corporation is the Southern Securities Company, and except as it differs in certain provisions which have been the subject of adverse criticism, it is substantially the same as to object, powers and privileges as the Northern Securities Company. Its nominal capital is \$100,000, but it can increase the amount at its pleasure. Who and what are behind this new charter are not disclosed on its face, and the names of the incorporators do not convey any information.

PASSENGER AGENTS MEET.

BY THE NEW ASSOCIATED PRESS—A.M.1

ST. LOUIS, Dec. 10.—The first session of a meeting of the Transcontinental Passenger Association that will probably take up the time of the next three or four days began here today with the representatives of most of the roads present. Chairman Carleton submitted a long docket of subjects to be considered, and acted on.

General passenger agents of western roads have been much disturbed by the decision of the Southern Pacific to withdraw from the military agreement, and interpret it as indicating a combination or alliance with the Santa Fé to control all Pacific Coast passenger business. In announcing its intention to be no longer a party to the military agreement, the Southern Pacific stated that its action was not dictated by any desire to cause a disturbance in rates on military business, but by conditions having changed since the agreement was made. Its object is to bring about at this meeting a reconsideration of the entire situation, and the adoption of methods that will meet present requirements.

The Oregon Short Line and the Union Pacific, says the Herald, held well aloof on Chicago and Missouri River westbound business until yesterday, when shippers over that system were informed that they would be "taken care of" no matter what might come up. GREAT SLAUGHTER OF BIRDS SOUTH.

VALUABLE SPECIES RAPIDLY BE-ING KILLED OFF.

Insect Eaters are Shot by the Whole sale Under the Belief That They Eat Grain-Songsters Shot for Food-Cruel Treatment of Cased Birds.

[Chicago Tribune:] Ornithologists are becoming alarmed at the continual slaughter of songsters and other birds in the South, and especially in the Guif States. Birds which go South for the winter in great flocks are preyed upon by thousands of hunters and trappers, who kill or catch them for the market indiscriminately.

Among these people—and, indeed, in much of Mississippi and Louisiana among the better class—robins and larks are considered game birds, and are so persistently hunted that their numbers are fast becoming less, and those that survive are becoming more and more shy. Birds which are natives

numbers are fast becoming less, and those that survive are becoming more and more shy. Birds which are natives of the South, such as mocking birds, egrets, "yvecs," red birds, tanagers, goldfinches, bluebirds, nonparells, and scores of others, are being killed off even faster. A concerted move is demanded to compel the State authorities to take action to prevent the extermination of many species.

That the killing of these birds is in no way discountenanced even in towns and cities is evidenced by an account brought back by Chicagoans who have made the matter a study. One of these, John Swain, writes back from New Orleans to friends in this city that has seen song birds slaughtered by boys in a way that would not be tolerated in this vicinity.

TAME BIRDS LURE TO DEATH.

"Here at New Orleans the killing of birds is something awful. I have been up the river a little above Carrollton and found a colony of men who make a living trapping birds. They have head-quariers in a bayou some distance away where they have a shanty boat. They come down to New Orleans in parties to market the catch. Mocking birds are common here, also red birds and tanagers and a kind of bird I do not know, but which is called 'nonpareil' or 'pop.'

"The men take double cages, in one side of which is a tame mocking bird, and hang them in the woods. The empty side of the cage is open. The mocking bird sings and the wild birds gather about it and enter the open part of the cage, and the door is at once released and springs shut. The trapper then takes the captured bird out of the trap and puts him in a small cage with others caught in the same way.

"The struggles of these captives, which I have witnessed, are pitiful in the extreme. Terrified by the strange situation in which they find themselves, the songsters, which have always been free, dash themselves again and again at the bars.

"In this way many are killed by breaking their necks. Others tear their fiesh on the bars and die. Some seem to die of grief or fright. The cages are kept dark in order that the imprisoned TAME BIRDS LURE TO DEATH.

"At last the cages containing the birds are put in a skiff. There may be a hundred indigo birds and an equal number of mockers, frightened, helpless, bruised, to be carried down. The men who are to take them cover the cage up carefully with canvas to exclude the light and keep the birds quiet, but many are certain to die on the way. When New Orleans is reached the birds that survive are sold for 20 cents each.

"Up in Mississippi, on the Yasoo River, I saw robins, woodpeckers, meadow larks and mocking birds served at the same meal on a steamer, and I have seen passengers go ashore at a landing and shoot orioles and other birds, which were brought on board to be cooked."

Other visitors to the South say that not only song but game birds as well are threatened with extinction. It is hard to realize, seeing the scattered flocks pass overhead in the fall sand spring, that these birds are growing fawer, but in Louislana they know it well. The ducks and geese spend the winter on the sand bars of the lower Mississippi, and especially in the bayous of Louislana and among the islands of the gulf coast.

The population of the gulf islands, and to some extent of the bayous, is made up of a mixed assortment of Malays, Chinese, negroes and Italiana, with renegade Americans and Arcadian French. It seems impossible for these people to understand any reason why they should not slaughter birds indiscriminately so long as they can get money thereby, and they resist any attempt to restrict this "right." Ducks they kill in enormous quantities. They congregate in colonies and make a business of killing redbirds and egrets, indigo birds and other bright-plumaged fellows for their skins, which formerly brought a high price in the market. Recently at the instigation of the Audubon Society, Louislana has passed a law interfering with this sale and forbidding the killing of birds for ornamental purposes.

A deale

than what they believed to be an unjust law, nevertheless stopped killing birds except for food since they were compelled to devote most of their time to some other means of living.

BOYS HIRED TO KILL.

In the rice plantations, which

Men's bandkerchiefs of good grade white silk, 1 is inch hemstitched, square, good weight, better than any 50c handkerchief in town; spe-cial for this sale, each, 40c. on the "Louisiana coast" of the Mississippi River, millions of birds are killed by negro boys and men. In eview field a boy is stationed with inchemists, railroad men and representaery field a boy is stationed with instructions to shoot every bird that
lights. It is the firm conviction of
many, even of the better classes, that
birds which are known to scientists
only as insect caters, eat rice and destroy grain. So the boys, told to kill
"rice birds," shoot everything that
comes their way. What is really known
as a rice bird in Louisiana is not the
bobolink which bears that name in the
Carolinas, but is either the same as or
similar to the redwing blackbird of the
Northern States. But the slaughter is
not restricted to this.
"All burds what lights down on de
rice land is rice bu'ds," declared a

rice land is rice bu'ds," declared a pickaninny when taken to task for destroying songsters.

"Is there good shooting hereabouts?" asked a sportsman from the North, at a little station on the Gulf coast, between New Orleans and Mobile.

"Yes, we've got qualls, partridges, robins, woodpeckers, indian hens, meadow larks, and a lot of other game birds," came the answer. The man who gave it was a deputy sheriff, whose duty included the enforcement of the game law.

"But doesn't the law forbid the killing of robins and meadow larks?" was asked.

"I'll be darned if I know," answered the deputy. "If it does, nobody pays any attention to it."

Nearly every Northern State now has stringent laws against killing songsters, and measures are being taken constantly to prevent the extinction of the birds that make orchard, lawn, prairie, and woodland meiodious in the summer. How futile these efforts will be if the South is not awakened to a similar duty can be understood when it is considered that these birds which are here for only a comparatively small part of the year are at home during all twelve months in the southern forests.

HART CASE SETTLED

COMPROMISE ARRANGED BETWEEN WIDOW AND SONS.

Woman Believed to Have Received the Same Amount California Laws Would Have Given Her—Close of a

A special dispatch to The Times from Racine, Wis., announces the settlement by compromise of the fight over the estate of the late John S. Hart, a wealthy orchardist of Lordsburg, this

wealthy orchardist of Lorasburg. When Judge Fish called the court calendar in the Circuit Court at Racine yesterday and the Hart case was reached, the attorneys moved that it be stricken from the calendar, as a settlement had been made.

Hart died at Lordsburg about a year ago, leaving an estate worth \$200,000. There was a dispute between his second wife and Sands M. and Elmer Hart, sons by a former wife, over the ap-

ond wife and Sands M. and Eimer Hart, sons by a former wife, over the appointment of an administrator. Mrs. Hart contended that she should be appointed in the State of California, where Mr. Hart lived only a part of each year, and the sons claimed he was a re sident of Wisconsin, and an administrator ought to be named there. The court decided that he was a resident of Racine.

Just how the case was settled is not stated, but the widow was allowed about what she would have received under the California laws.

The case had sensational incidents before it reached the Wisconsin courts, one being the seigure of a safe containing securities valued at over \$100,000, and sending them to Wisconsin, thus putting the suit before the Wisconsin courts.

SAN JOAQUIN ADVERTISING.
BAKERSFIELD, Dec. 10.—(From The Times' Resident Correspondent.) The project to advertise the San Joaquin Valley in Lps Angeles with the hope of attracting the attention of eastern tourists is toking definite shape, a meeting of several representatives from various towns having been held here today. Support is assured from Tulare, Fresno, Stanislaus and Ban Joaquin counties, and it is believed that the remainder can be induced to contribute a pro rata share toward the expenses of a bureau to be maintained in Los Angeles. The plan outlined at today's meeting calls for the expenditure of 1659 monthly, and it is proposed to raise a guarantee that this shall be available for at least one year. The carrying out of the idea has been left to Senator S. C. Smith, president of the Valley Commercial Association.

struct a line of street railway through this unsettled portion of the city, it is certain that the speedway enterprise will have to be abandoned for a time if the franchise is sold by the Council. For many months the driving club has been considering the speedway project, but it is not generally known that partially matured plans have been formed for the use of Twenty-ninth street for a mile and one-half west of Budlong avenue, and if a line of street railway is established on that street it will defeat the plans of the driving club. There must be no obstructions to a speedway, such as the club desires to establish, and it is manifestly impossible to race horses where

LEGAL LIGHTS LET LOOSE.

Blackstone's commentaries on the common law, Kent on contracts, and a vast amount of legal lore from many authorities were hurled at the Police Commission yesterday morning relative to the license tangle in which the saloon at No. 314 West Seventh street is involved.

Commissioner Thorpe, who prides himself on being something of a lawyer, drank in the technical discussion with great avidity. He even went so far as to ask a few questions of some of the lawyers. To the other members of the board the legal talking match proved very wearisome.

Finally the board decided that questions of property rights, contracts, attachment and replevin suits, were not fit matters to be brought to the attention of the board. The rival breweries were therefore told to settle the disputed ownership of the saloon in the courts and then the commission will decide the disposition of the license.

When the session began the room was crowded with lawyers representing one side or the other of the controversy. W. R. Hagan, the former proprietor of the

Then the attorneys went at the argument again hammer and tongs until Commissioner Stimson succeeded in stemming the tide long erough to enter an objection to the consideration of a legal question of property rights which was not material to the board. license at No. 601 East Third street from Philip Eicholts, but the application was finally granted by a vote of three to two, Stimson and Thorpe voting against it. The saloon was formerly run by Andrew Fuhrberg, and the license was held in the name of Henry Tosiman. Fuhrberg was found guilty of a violation of the Sunday-closing ordinance, and the license was revoked and subsequently reissued to Elcholtz, who is the owner of the property.

Gen. W. E. Webb of San Diego Explains His Arrest in Ensenada ing Demand for Platinum-Bob Tail' New Stamp Mill.

A strike of importance has been made in the Tejunga country less than forty miles northwest of the city. According to reports local operators have unearthed several veins of free-milling gold ore that are unusually rich, as shown by an experiment yesterday. A test was made of five samples taken from as many small veins and the result was an assay of \$100 to the ton. For many years the Tejunga has been regarded as a productive mining country, and in the early days there was more or less development by the Maxicans. In recent years several good deposits of ore have been encountered, but the latest find is said to be remarkable for its richness.

As yet little work has been done on the property, but as soon as the result of the assay is known, it is anticipated that preparations will be made to carry on development on a large scale.

TROUBLE ON PENINSULA.

THREW "BONES" FOR CLAIM.

SAN DIEGO, Dec. 3.—(From The Times' Resident Correspondent.) Gen. W. E. Webb returned this morning from Ensenada. In speaking of his arrest and incarceration in the Ensenada jail on a charge of calumy, he said:

"I was arrested on the complaint of J. H. Packard, the manager of the English company there, on the charge of calling him a liar, thief and scoundrel. The difficulty arose over the location of some properties which I was adding to my holdings. I have been for twelve years a large holder of iron properties on the peainsula, and have spent much money in developing them, being the first to work iron properties there. The trouble was over the Iron Mountain claim, which has proved to be very valuable, and which was recently acquired.

"I have been treating for the sale of this claim to eastern parties, "" Mr. Packard has been trying to buy it. A man named E. Gomez, a native citizen and for fourteen years a resident of Ensenada, and who has always stood well, acted for many Americans in paying dues on the mines. When all the money had been paid on Webb's location except the stamp tax on the patents of about \$40, Gomes absconded with the stamp money. Gomes's son was Packard's cashier.

"The morning after the mines could be relocated, Gomes and Packard's attorney, Pedro Rendon, appeared at the mining agent's office and with E. Riveroli jumped the Iron Mountain claim. They threw dice to see who should have the claim. Riveroli won it and as I hurried in offered to convey it to me and stated before several citizens that the would do so. He received from me as agreement which I have now ordered shall be shown in court. So the mines were jumped by Packard's cashier, Packard's active learning the property to the same New Tork parties I had been negotiating with. I feel that I would have thad no trouble recovering the property in Ensenada. I propose the following test:

"Let three citizens of San Diego and secundrel, then he shall apologize to the public and give \$500 to the Ban Diego Eastern

Wheatley was seen about the salesroom several hours yesterday, and his suspicious movements attracted attention to him. A Maynard carbine and a Springfeld rife were missed, and while the man was watched he was seen to take another gun and sneak out of the place. A salesman followed him, but he turned the weapon upon his pursuer, who gave up the chase and sought a policeman. The officer found the stolen weapons in a bar-room, where Wheatley is said to have secreted them. Wheatley was arrested, and when searched at the Police Station 2182 75 was found as the

Rheumatism

The cause of much suffering

Rheumatism is the cause of half our aches and pains; it comes quickly and remains a long time unless removed at once.

The changeable weather which always comes at the beginning of winter is likely to bring out the rheumatism and all rheumatic sufferers should be prepared—they should have a bottle of Halpruner's Rheumatism Cure at hand where they can take it instantly, where they can rub it on the aching parts and rub out the pain, so that they may take it interally to remove the cause.

It is greatly to be deplored that the conflict in South Africa has not been brought to a close ere this. The Boers would have been vastly the gainers had they submitted to the inevitable long ago. But the facts of the case must not be lost sight of. Boer sympathizers constantly refer to "the South African republics." As a matter of fact there are no South African republics, and no South African re-publics have ever existed. The government maintained by the Boers in the so-called Transvaal republic was not a republic, but an oligarchy, in which the many were taxed unmercifully for the benefit of the few-those few being the Dutchmen who "ran"

TIMGRATISM A FAILURE

TONSORIALISTS REJOICE OVER THE CHEAPER SHAVE,

Smaller Bosses Declare They Have Lost Considerable Trade Through the Recent Attempt to Charge More Than the Traffic Would Bear.

"Now that the leaders of the Bar-bers' Union have tried their little ex-periment of attempting to enforce a tariff higher than the traffic will bear, we are all glad to be permitted to re-sume trying to make a living in ac-cordance with our own plans, free from interference or fear of fines and boycotts"

In the above words an East Firststreet boss barber voiced the sentiments of at least haif of his fellows in
this city regarding the reduction by
the union in the price of a "fair"
shave from 15 to 10 cents.

The forced action simply marks another failure of this union idea, and
defeat of Jimgray socialistic plotters.
Their theory that the barber combination could make people pay any price
desired has been exploded, but the experiment has cost many small barbers
a round sum.

A Times reporter interviewed many

clared the union a failure, though fearing the consequences of making such
a statement for publication.
The worst sufferers by the union's
policy have been the small shopmen.
Many of them had good trades at the
10-cent scale, but lost their customers
when forced by the union to raise their
prices. The alternative was the infliction of the "unfair" brand and a
boycott.

fliction of the 'unitar' broader' boycott.

The employer quoted above continued: "My trade has been seriously impaired, for my custom has been among workingmen who would not pay is cents. The arbitrary scale was opposed by me from the first, for the bootblacks tried doubling prices, and had to come off their high perch. It will be a good while before I get hack the custom that I had nine months ago. The business of all the smaller shops has been seriously demoralized." But while many of the modest establishments have had hard times, it has not resulted in a corresponding increase of trade at the swell places. The proprietor of one of the finest tonsorial pariors in the union said, when asked whether he expected to lose by the restoration:

"It never made any difference worth mentioning with us. I know the smaller shops have been squealing, and with cause, and for their sake I'm glad that they have been allowed to shave for 10 cents without being designated 'unfair.' Not many customers of the 18-cent shops came to us. They took to shaving themselves, and will doubtless drift back to their old barbers.

"The union has never benefited anyone but, possibly, the journeymen, who like the 7-o'clock-closing rule. Still, if a man is working on commission, shortening the hours merely reduces his income."

running into Los Angeles will gather no moss during the next two months. That is certainty—and a passenger-car famine is a possibility.

Guch a state of affairs in the freight business is not at all uncommon, but heretofore there has been ample accommodations for all passengers, even during the height of busy tourist seasons. But the present tide of travel is record-breaking, and the rolling stock of the roads will consequently be taxed as never before.

ord-breaking, and the rosing stock of the roads will consequently be taxed as never before.

Between 50,000 and 60,000 easterners have been booked for Southern Callfornia, to start West immediately after the holidays. This is undoubtedly the greatest volume of travel since the Christian Endeavor Convention delegates swamped the Southern Pacific between Ogden and San Francisco. The record for swift and safe handling of crowds then made will have to be more than equaled to accommodate the tourists the next few months.

The local officials of the Southern Pacific, Santa Pé and Pullman company are not in position to know certainly what the eastern operators are capable of doing, and predict that there will be no great shortage in engines or cars. But advices from the East regarding the extraordinary number coming west make it appear certain that the operating departments will be kept hustling to provide the equipment.

TERMINAL ROUNDHOUSE.

The contract was let yesterday by the Sait Lake road for a forty-one-stall roundhouse to Contractor Byerile. Stalls for fourteen engines must be completed by April 15. The cost of the building will be about \$25,000, and it will be located beside the river bed at Fourth street, on the large tract recently purchased by the company for shops. It is announced that trains will be running to Pomona by Fobruary 1.

Gifts to go East must be chosen first—they've many miles to travel before Christmas day. Perhaps you're hesitating because you don't know what to send. Take these suggestions: A bex of California Prunes; a package of Stuffed Prunes; California Crystalized Prul; Cluster Raisins handsomely packed. This is the country where they are grown, where they're prepared, where they're put up, and there are none others to equal them in the world. There isn't anything you could send East that would please the people in that forces country so much as a box or these fruits. We have them in different size boxes, ready to send.

Most Costly Building.

Every Sunday afternoon from 4 o'clock to 5 o'clock there is a service in the crypt of what, when it is completed, will be the Cathedral of 8t. John the Divine of the Protestant Episcopal Church, in the diocese of New York, of which Bishop Potter is the head.

The dimensions of the cathedral are: Length, £05 feet; across the transept, nearly 300 feet. The front will be 200 feet in width, aid flanked by two glant towers. The corner-stone of St. John's was laid on St. John's Day in 1892. Notwithstanding accepted specifications and contracts no one certainly can tell the final cost, but it is estimated that the sum necessary to finish the work will be \$50,00,000 or \$30,000.

CRESCEUS WORKING.

RACK BEING IMPROVED.

Work has been commenced putting the race track in first-class condition for the attempt of Cresceus to lower his world's trotting record next Saturday. The track is first thoroughly soaked, then worked with the big harrow, scraped, and finally gone over with the nail harrow. Ketcham anticlipates that by Saturday it will be as fast as any in the country. The great horse was given fast work yesterdy, and appears fit.

It is possible that Ketcham may bid for Primrose and Sweetheart, at the Potter sale of thoroughbreds. He was to have taken these two East with him for breeding purposes, but Mr.

BOSTON, Dec. 10.—The Democrata completely overwhelmed the Republicans on the city election today, Gen. Patrick A. Collins being elected Mayor over Mayor Thomas A. Hart by the largest plurality in a quarter of a century. The Democrats likewise obtained control of both branches of the city government, elected their street commissioner, S. A. Charles, and practically the city voted-strongly in favor of license.

The result of the canvass was fully as much of a surprise to the Democrats as to their opponents. The most sanguine prophet last night claimed only 1000, yet this plurality was nearly tripled. Two years ago Mayor Hart defeated Gen. Collins by 2281 votes, and poiled something over 40,000. This year the total Republican vote for Mayor was a trifle over 32,000, the smallest given a party candidate for Mayor was a trifle over 32,000, the smallest given a party candidate for Mayor since 1893, despite a registration almost 50 per cent. larger than then. Yet Gen. Collins received over \$2,000 votes, the largest in the history of the city, and he carried eighteen of the twenty-five wards.

The Republican leaders were inclined to blame the weather tonight, but this does not account for the tremendous gains made by the Democrats in Republican wards.

Fish Without a Name.

Pish Without a Name.

Naturalists are at a loss to classify a strange fish recently caught near Chenier Island, La. In a way, says the Boston Globe, is resembles a dozen different species, but on the whole it is strongly unlike any of them.

Charles A. Schmidt has sent detailed descriptions and photographs of the fish to all the prominent naturalists societies, but no one has yet been able to identify it. The fishermen who frebuent the waters in which it was caught declare they never saw anything like it before.

Mr. Schmidt says the fish probably belongs to the teteradon class, but states at the same time that he can give no conclusive reasons for such a classification.

The curious fish is about 20 inches in length and weighs about 25 pounds. It has the mouth of a parot and well-developed lips, which are like unto those of the human being.

The under part of his body is covered with projections similar to those of a porcupine fish, with the difference that the guills are aborter. It has no gills.—Philadelphia Record.

The weeding out of unsubstantial oil companies is about to begin in real earnest, and it is freely predicted that before January I many helpless and hopeless oil operators will have given up the struggle.

The expected is about to happen in the Kern River field, where a number of high royalty leases are to be surrendered. Months ago over-enthusiastic promoters agreed to almost everything to get a foothold in the great Kern River field, but since then they have failed to fulfill the terms of their leases, which called for the drilling of a number of wells that seemed reasonable at the time contracts were made, FULLERTON. a number of wells that seemed reasonable at the time contracts were made, but which is now out of the question. For such operators there is nothing left but to retire.

The weeding out of such companies is bound to bring about a better condition in the field, as it cannot be denied that it was the weak companies that demoralised the condition of the fuel oil market. They were originally launched with the expectation that the first well would furnish the funds for the second, and so on, but this hope having failed, they have been driven to part with their oil at any, even ruincluded, have traded upon their necessities, with the result that all have been affected by a decline that became general.

Angeles Court to Rescue Little Ones from Point Loma and Tingleyiam-Young Girl's Grave Error.

SAN DIEGO, Dec. 10.—[From The Times' Resident Correspondent.] Acting in accordance with a writ of habeas corpus issued from the Superior Court in Los Angeles, the Sheriff of this country today served papers on Grate G. Bohn and Katherine Tingley of the Point Loma spook establishment, directing them to produce the two sons of John J. and Grace G. Bohn before the Los Angeles court. Technically the little ones are now in Bohn's possession. Several weeks ago the case created considerable interest when Mr. Bohn of Chicago endeavored to secure possession of his children on the grands that they were detained against his will at the mysterious. Theosophists' roost, and that he was prevented having access to them. He ceased his efforts at that time, as he said because he felt that his wife was under undue influence and not responsible for her actions, and he was unwilling to cause her annoyance. Now, he says, he has information that there is a movement on foot to take the children to Mexico, where he could not take legal measures for seeing them. His affidavits to this effect resulted in the issuance of the writ of habeas corpus in Los Angeles.

Mrs. Bohn, who says she is "stopping" at the "homestead" as a guest for the benefit of her health, has issued a signed statement anent the controversy, in which she sets forth that she

Miss Fuquay is the eighteen-year-old daughter of Mr. and Mrs. Thomas Fuquay, who are ranchers near Potero. She is a girl of excellent reputation and is unsophisticated in the ways of the world. It is thought from all indications that she has been opening letters which go through that postoffice for some time. Her motive was probably more from idle curiosity than anything else. She was detected in opening two letters by Postmaster Thing, who notified the authorities.

It is understood that the opening of the letter on which the accused will be prosecuted contained 50 cents, which she appropriated. Her father accompanied the girl into the city and furnished bonds in \$560, whereupon ahe was released. Her mother has not been notified, and it is feared that she will be prostrated. The penalty in such cases is a fine of not more than \$500 and as much less as the judge sees fit. It is believed that the girl did not realize what she was doing, and will probably get off lightly.

RIVERSIDE, Dec. 10.—[From The mes' Resident Correspondent.] The py Attorney today submitted a written opinion to the city Board of Trustes, declaring that A. S. White has recited his office as a member of the py illorary board of trustees, because was out of town over sixty days thout formal leave of absence. Inite's absence probably would never ave been made a public lasue, had it to been for the squabble over a site or Carnegie's \$20,000 library. White splic sentiment was crystallising in avor of the City Park, named after thite, as the most suitable and consenient site for the library. The City frustees courteously deferred action mill White's return, when a majority of the library trustees, White, Holmes, and Deere, took things in their own hands, and by a vote of 3 to 2 decided to purchase the Pessenden Block, Sevmith and Orange streets, as a site for the library, the price being \$3000. Then some one raised the question that White's vote did not count, because he was not legally a library trustee when his vote was cast. The City Attorney holds, however, that the vacancy in the case of White does not affect the legality of the purchase of the library site. CITY HOSPITAL PAVORED.

At a meeting of physicians held last evening at the residence of Dr. Van Zwalenburg, there was an unanimous expression of opinion in favor of the establishment of a city hospital here, to which every physician should lend his personal support. The committees were appointed, one on organization, consisting of Drs. Dickson, Van Zwalenburg, Parker, Way and Atwood, and one on location, consisting of Drs. Clarke, Bell and Baird.

ANTI-GAMBLING LAW.
REDONDO, Dec. 10.—[From The Times Resident Correspondent.] Saloon circles were greatly agitated last evening when at the meeting of the Board of Trustees one of the members proposed an anti-gambling ordinance uponthe lines lately adopted by the Lou Angeles City Council for the closing up of all "club" rooms. The proposition was referred to the City Attorney with instructions to report at the next meeting, the 28th inst. Meantime the gamblers and saloonists will pull every available string to prevent the passage of such a law, which would rid the town of a number of undesirable characters.

Mrs. J. D. Higgins, wife of a farmer, near Redondo, just stepped out of a buggy, leaving her two little children on the seat, when the horse ran away. Mrs. Higgins, in an endeavor to check the animal, was knocked down. The children, of whom the eldest is only 6 years, held bravely to the reins, but the animal made a sharp turn, and threw them under the wheels. Neither mother nor children sustained serious injuries.

POMONA.

NEWS NOTES.

POMONA, Dec. 10.—[From The Times' Resident Correspondent.] The Board of Trade at its monthly meeting last night, heard reports from its delegates to the Chinese exclusion convention in San Francisco. A letter was read from Frank Wiggins, secretary of the Loa Angeles Chamber of Commerce, stating that Pomona was awarded a gold medal at the Buffalo Exposition for olives and grapes in iquid, and a bronze medal for Hungarian prunes in liquid.

R. M. Furlong was here from Pasadena yesterday on business connected with the Pomona foundry and machine works.

Funeral services over the remains of the late E. P. Cooley were conducted at the late home of the deceased on East Holt avenue this forenoon. The annual meeting of Pilgrim Con-gregational Church will be held Wednesday evening at 7:30 o'clock. Supper will be served at 5:30.

COVINA.

TROLLEY WORKERS MEET.
COVINA, Dec. 16.—[From The Times' Resident Correspondent.] The probable construction of an electric road direct from San Gabriel to Pomona via Covina has created a great deal of interest along the proposed route. Another largely-attended meeting of people interested was held at the Covina Country Club this morning. El Monte sent a delegate. Mr. Brockway, to show good will in the enterprise. The time was devoted largely to the statistics from the various localities, showing the amount of business which would accrue to the road if built. The secretary, J. L. Matthews, was directed to compile these reports, and as soon as a conference can be arranged with the officials of the Los Angeles Railway Company they will be submitted by a committee from the various localities. The meeting adjourned to meet in Pomona at the call of the chairman, E. H. Lahee.

Citizens interested in the formation of a rural mail delivery held another meeting this mogning, when the committees reported progress. Necessary steps are being taken for the formation of a route covering the territory west and northwest of Covina.

EXCLUSION NOT TOTAL

Labor Convention Hits a Big Snag.

Delegates Divided as to Japanese.

Ticket Scalpers Find a Host of Friends-Universal Label Agitation.

BY THE NEW ASSOCIATED PRESS—P.M.)

SCRANTON (Pa.,) Dec. 10.—The exclusion of Chinese, Japanese and other Asiatics from American territory, the ticket-scalping legislation and the advisability of adopting a universal label for union-made goods, were the principal questions that claimed the attention of the delegates at today's sessions of the American Federation of Lul or.

sions of the American Federation of Lalor.

The resolutions advocating the exclusion of Chinese were adopted by the convention with a considerable hurrali, but in the matter of excluding natives of Japan and ether Asiatic lands a mak was struck, and this part of the anti-Mongolian agitation was killed, so for as the present convention is converned. The special committee having charge of the exclusion matter was unanimous in favorably reporting the Chinese section of the resolution, but was divided in regard to the Japanese. The Facific Coast delegates led the discussion on Chinese exclusion, but were divided when it came to excluding other orientals. The burden of the remarks of those opposed to the Japanese resolution was that Chinese immigration was the greater vell of the two, and that to insist upon some restrictive, law to prevent a Japanese invasion may endanger the passage by Congress of the Chinese act.

The ticket-scaiping debate was a lively affair. When the viva roce vote was taken, those in favor of permitting ticket-scaiping won by an overwhelming majority.

The agitation for a universal label, which has been carried on for a long time, has ended in defeat.

VOLUMINOUS RESOLUTIONS.

The agitation for a universal label, which has been carried on for a long time, has ended in defeat.

VOLUMINOUS RESOLUTIONS.

(BY THE NEW ASSOCIATED PRESS-A M.)
SCRANTON, Dec. 18.—The first business to come before the convention of the American Prederation of Labor this morning was the introduction of the delegates by the presentation of the delegates by the presentation of resolutions at this time, when they could easily have been presented last Saturday. When the constitutional limit expired. The resolutions dealt with the piano-makers and the wood-workers regarding their trade jurisdiction.

The committee having charge of the secretary's report recommended that the suggestions made in that report be accepted, with the exception of that referring to the per capita tax of national and international unions. The committee recommends that the tax be increased from one-third to one-half per cent. per month. The recommendations were adopted.

The Committee on Resolutions then presented a voluminous report. Among the resolutions over which they claim to exercise authority. This brought up the question of autonomy, and First Vice-President Duncan made the important announcement that he will ask for the appointment of a special committee to consider the whole question of autonomy. This had the effect of killing the resolution, there being no opposition to the motion to adopt the recommendation of the committee.

The resolution pledging the American Federation to use every homerable means to prevent the passage by Congress of anti-scaiping legislation wa

resolution, and the organization was treading on dangerous ground. Lennon said many of the ticket scalpers were criminals, and told of a case where 45.00 tickets had been forged on one railroad and sold by scalpers.

Lee Hart of Chicago of the Theatrical Stage Employes' National Alliance, and E. A. Agard, the Mayor of Fairbury, Ill., who represents the glassbottle blowers, led those who favored the resolution. They maintained that ticket-scalping was a legitimate business, and was the means of cheapening railroad travel.

The discussion was continued by W. J. Croke of Marion, Ind., of the Flint Glass Blowers: C. O. Sherman of the Chicago Metal Workers and Eugene O'Rourke of the New York Typographical Union, who favored the resolution, and Sheldon A. Harris, Dwight, Ill., who is a Congregational minister and a member of the Federal Union, and Dennis Hayes, Philadelphia, of the Glass Bottle Blowers, who opposed it. The previous question was moved after Lennon had made a motion to lay the resolution on the table, which was lost. The resolution was then adopted by an overwhelming viva voce vote. The delegates representing, the Railway Telegraphers went on record as being opposed to the resolution.

Among the resolutions adopted by the convention were these: Giving the right of suffrage to the citizens of the District of Columbia; to aid the Actors' opposing the sale or cession of irrigated lands to corporations or speculators; that musicians and skilled mechanics be ingluded in the alien-contract law.

Duncan made a motion that a special committee of five, one of whom shall be President Gompers, be appointed to take up the question of autonomy, and that this committee on Exclusion reached the pasmittee on

VIRUS AND SERA.

Laws Regulating Their Manufacture Must Be Revised in the Interest of the

Public Health.

(BT THE NEW ASSOCIATED PRESS—A.M.)

NEW YORK, Dec. 10.—Dr. W. R.

Inge Dalton, at a meeting of the Society of Medical Jurisprudence held last night, attacked the system employed by the Board of Health in the manufacture and distribution of anti-toxin sera and vaccine virus.

Recalling the recent deaths in Camden, St. Louis and other cities from tetanus, or lockjaw, Dr. Dalton attempted to fix the responsibility therfor. His paper, which was emitted "Commercialism and Responsibility in Connection with Anti-Toxin and Vaccine Virus," precipitated an animated oficusion in the course of which the New York City government was assailed and defended, and Dr. Love, formerly of St. Louis, denounced the authorities of that city for vaccination methods in unmeasured terms.

The action of the State authorities in providing for the inspection of sera and virus by the State Board of Health was indersed, and members of the seciety who are members of the reciety who are members of the har association, expressed the opinion that to safeguard the public sealth, a revision of the laws relating to the manufacture and sale of these preparations would be advisable.

COLOSSAL ASSORTMENTS ON THE FIRST AND THIRD FLOORS,

There are no drugstore prices attached to these leather goods. We handle everything we sell on an economical basis. The small margin of profit made possible by combining all linguous under one roof is most forcibly exemplified in this announcement.

We made immense purchases of leather goods long before the holiday season was thought of by most merchants, consequently we can sell all grades for about what other merchants are paying for the same qualities. To the uninitiated our prices may seem impossible, but we assure you that every price quoted here is accurate and every description is true. We declaim an article made of alligator skin if it is made of a stamped or embossed leather. When we say a "seal skin", you may depend upon getting nothing else. This sale affords an paralleled opportunity for Christmas shoppers. If you glance it through it will suggest many things that otherwise you might overlook.
